Technical Architecture

EZESITE is ideal for construction companies with on-site offices that require the WiFi connectivity from day one without any delays.

Technical Architecture

EZESITE is ideal for construction companies with on-site offices that require the WiFi connectivity from day one without any delays.

EZETRANSPORT AC750B series is carefully designed with built-in dual WiFi antennae, 4G/3G Antennae, GPS modules, vehicle anti-interference and fanless heat-sink for use in transportation. It supports 12~24 or 48 volts power and can be powered using the vehicle power supply. It has built-in protection against vehicle's power fluctuations, thereby offering a one-fit solution for multiple transportation types. The EZE-AC750B can be integrated with the monetization platform from EZELINK to provide targeted and location-based advertisements.

**Need to get your site
connected quickly?**

- Plug & Connect
